# Lucas

The new and improved range of Lucas replacement mirrors is now available.

## Reflecting Quality

Every Lucas mirror is meticulously manufactured to look, feel and perform just like the original part. The only significant difference you'll spot is the price.

## Comprehensive Range

The range covers approximately 90% of the UK vehicle parc and consists of complete units, mirror glass and covers. Whatever the damage, the new improved range has it covered.

## Latest Technology

The humble wing mirror has become a complex component in recent years, often featuring integrated lighting, electrically driven units, heated mirror glass, integrated antennas, memory functions and GPS. Rest assured, if the original had it, the Lucas mirror has it too.

## E-marked for the UK

All Lucas door mirrors are E-marked and specifically manufactured for the right hand drive UK market.

## Why Pay More?

The Lucas brand is one of the most recognised and trusted in the aftermarket. There really is no reason to pay a penny more.
