Lucas makes sense of Lambda Sensors

Lucas Engine Management, a division of number one electrical aftermarket specialists **Lucas Electrical** has further strengthened its electrical portfolio by expanding on its market-beating **Lambda Sensors** provision.

Delivering superior quality, the Lambda Sensors programme covers an impressive 80% of the UK vehicle parc and has its very own dedicated catalogue (**ref. XCB462**).

The complete programme features sensors for both direct-fit OE replacements and also (where appropriate) Universal options. Notable OE-specific applications include marques such as the Aston Martin DB, Citroen C8, Peugeot 807 and the Jaguar X-Type. Other highlights comprise a lean burn sensor for the Toyota Carina E with manual transmission and a five-wire broadband sensor for the VW Polo FSI engine.

Lucas Engine Management provides customers with a complete range of engine management products, drawn together into one specialist programme. The range comprises Switches & Sensors, Ignition products and Fuelling & Emissions components.

For further information about Lucas' **Engine Management** programme or to request a free copy of the 2006 Lambda Sensors catalogue, call **0870 608 0762**.
