Lucas delivers affordable safety solution with Xenon Beacons

Lucas Warning & Safety, a division of number one electrical aftermarket specialists **Lucas Electrical** has launched a new range of cost-effective **Xenon Beacons**.

Perfect for plant and off-road applications, the single flash, amber Xenon Beacons provide unrivalled light output with an exceptionally low current draw. With triple bolt and magnetic fixing options, the Beacons feature an ultra-low profile for maximum impact protection against overhang and branches. The Beacons are also fitted with state-of-the-art electronic circuitry, including a replaceable flash tube that eliminates the need to discard the whole beacon should the flash fail.

“We are delighted to announce the launch of this latest Beacon offering, and are confident that we will now deliver even greater choice and availability to a wider customer base,” said **Gary Richardson, sales and marketing director of Lucas Warning & Safety**. “Our products offer our customers the top quality they require, whilst our direct supply structure ensures that we can deliver an effective and responsive service to the aftermarket.”

Lucas Warning & Safety provides customers with a complete range of original warning & safety products, drawn together into one specialist programme. The range includes beacons, lightbars, minibars, reversing alarms, CCTV and worklamps.

For further information about Lucas' **Warning & Safety** programme or to request a free copy of the 2006 Warning & Safety catalogue, call **0870 608 0763**.
